

**SolarMax Energy Systems**

# **Eco-home energy storage company**

## Overview

---

What is eco Stor?

ECO STOR has designed a solution that repurposes used electric vehicle batteries to provide affordable energy storage for residential buildings. “Our company is positioned between two megatrends: the enormous growth of renewable energy and the electrification of transportation.

Why should you choose eco Stor?

They can also store the energy from their solar panels to cover peak loads in their home, saving money on high electricity costs. The battery’s wall-mounted casing is attractive and discrete, ensuring that homes remain aesthetically pleasing. ECO STOR’s system significantly cuts the cost of small-scale energy storage.

Is eco Stor a megatrend?

“Our company is positioned between two megatrends: the enormous growth of renewable energy and the electrification of transportation. This is creating a huge market for low-cost energy storage, which our technology is able to provide,” says Trygve Burchardt, CEO of ECO STOR.

Can EV batteries be reused in energy storage?

ECO STOR recently signed an MoU with Nissan, Norsk Gjenvinning and Agder Energi to reuse EV batteries in energy storage and recycle spent batteries. In addition, it has established a German subsidiary, ECO STOR GmbH, that offers grid-connected energy storage solutions using new batteries.
