

## SolarMax Energy Systems

# Economics of Uzbekistan s energy storage power station

## Overview

---

How will Uzbekistan improve electricity production?

The government plans to invest \$4 billion in the National Electric Grid of Uzbekistan over the next five years to facilitate these projects. Reducing electricity production costs is another major priority, with a particular emphasis on alternative energy sources.

Will Uzbekistan fund a 250-megawatt solar photovoltaic plant?

TASHKENT, May 21, 2024 — The World Bank Group, Abu Dhabi Future Energy Company PJSC (Masdar), and the Government of Uzbekistan have signed a financial package to fund a 250-megawatt (MW) solar photovoltaic plant with a 63-MW battery energy storage system (BESS).

How much energy does Uzbekistan use?

Using these data, one can calculate Uzbekistan's total domestic energy consumption as being 49 to 50 million t.o.e (Box 1.1). At present, hydropower is the only renewable energy source with a significant share in Uzbekistan's energy balance.

What is Uzbekistan's power sector?

Power sector is one of Uzbekistan's key economic sectors. Total installed capacity of Uzbekistan's power plants exceeds 12.4 GW.

What is Uzbekistan's primary energy source?

As the data on primary energy resources production in Table 1.1 and Figure 1.1 show, natural gas is the Republic of Uzbekistan's main source of primary energy, constituting nearly 85% of the total amount of energy it produces. Oil and natural gas condensate make up about 13% of the country's primary energy production.

What is Uzbekistan's energy policy?

Since the beginning of independence, the Government of Uzbekistan has implemented its energy policy as part of its socio-economic policy, focusing it largely on maintaining Uzbekistan's energy security and using energy resources to further the social aims of the society of Uzbekistan.
