

SolarMax Energy Systems

Ecuador household photovoltaic energy storage prices

Overview

As of March 2025, residential solar panels in Ecuador cost between \$0.42 and \$0.68 per watt installed. For a typical 5kW system, that translates to \$2,100–\$3,400 before tax incentives. How much electricity does Ecuador need?

Ecuador had a peak demand of 5,110 MW in May 2025, and according to CENACE, electricity demand grows by 360 MW every year. Ecuador's energy shortage could result in a recurrence of power outages, particularly in the dry season of September through December. Ecuador has added minimal generation in recent years.

What type of energy does Ecuador use?

Ecuador's renewable energy is comprised of hydro power (5,419 MW), biomass (1550 MW), wind (71 MW), photovoltaic (29 MW), and biogas (11 MW). Hydroelectric power plants are in three regions: coastal (2 provinces), Andes (9 provinces), and Amazon (4 provinces).

Where does Ecuador's electricity come from?

Ecuador's state-owned electricity company, CELEC EP, imports electricity from neighboring Colombia. CELEC is also increasing diesel purchases from Petroecuador to power its thermal electric power plants. Ecuador had a peak demand of 5,110 MW in May 2025, and according to CENACE, electricity demand grows by 360 MW every year.

How did Ecuador's power outages affect economic activity in 2024?

During a prolonged dry season in 2024, Ecuador's over-reliance on hydropower (78 percent of total generation) resulted in daily blackouts of up to 14 hours, hurting economic activity. According to Ecuador's Central Bank, power outages caused economic losses of about \$2 billion in 2024.

Will Ecuador import natural gas?

Ecuador plans to accelerate the procedures to import natural gas to supply the largest thermoelectric plant in Ecuador, Termogas Machala, which works at 50 percent capacity.

What is Ecuador's nuclear energy plan?

Ecuador's nuclear energy plan contemplates a 300 MW small modular reactor in the medium term and a 1 GW reactor in the long term. In May 2025, Ecuador became a member of the International Atomic Energy Agency (IAEA). The next step is to enact the legal framework to oversee and regulate nuclear energy.
