

SolarMax Energy Systems

Energy Storage Battery Thermal Control

Overview

The Battery Thermal Management System (BTMS) is a concept that deals with regulating the thermal conditions of a battery system. A good BTMS keeps the battery system's temperature within optimum levels during charging and discharging, thereby improving its performance, safety, and lifespan.

Energy Storage Battery Thermal Control

Battery Thermal Management

The Battery Thermal Management System (BTMS) is a concept that deals with regulating the thermal conditions of a battery system. A good BTMS keeps the battery ...

- Efficient Higher Revenue**
 - Max. Efficiency 97.5%
 - Max. PV Input Voltage 600V
 - 150% Peak Output Power
 - 2 MPPT Trackers, 150% DC Input Oversizing
 - Max. PV Input Current 15A, Compatible with High Power Modules
- Intelligent Simple O&M**
 - IP66 Protection Degree: support outdoor installation
 - Smart I-V Curve Diagnosis Function: locate PV string faults accurately and automatically detect faults
 - DC & AC Type I SPDs: prevent lightning damage
 - Battery Reverse Connection Protection
- Flexible Abundant Configuration**
 - Plug & Play, ETS Switching Under 10ms
 - Compatible with Lead-acid and Lithium Batteries
 - Max. 6 Units Inverters Parallel
 - AFD Function (Optional): when an arc fault is detected the inverter immediately stops operation

- Voltage range: 91.2-947.2V
- >6000 cycles (100%DOD)
- Rated battery capacity: 216KWH (customizable)
- EMS communication: 4G/CAN/RS485

Power and Control Applications for Thermal Management ...

Enhance the performance of your thermal management system with our control and power protection solutions. A complete product offering from a reliable supplier for safely starting and ...
