

## SolarMax Energy Systems

# Energy Storage Container Technology

## Overview

---

What is a containerized battery energy storage system?

Containerized Battery Energy Storage Systems (BESS) are essentially large batteries housed within storage containers. These systems are designed to store energy from renewable sources or the grid and release it when required. This setup offers a modular and scalable solution to energy storage.

What is a containerized energy storage solution?

A containerized energy storage solution makes it easier to ship and transport the storage system to the last mile without much hassle.

Are energy storage containers a viable alternative to traditional energy solutions?

These energy storage containers often lower capital costs and operational expenses, making them a viable economic alternative to traditional energy solutions. The modular nature of containerized systems often results in lower installation and maintenance costs compared to traditional setups.

Why do we need large energy storage systems?

With new-age and conventional utility companies joining the movement to build large-scale renewable energy projects, there is a demand for large energy storage systems that can meet the rigorous demands of the grid while also handling the intermittency of wind and solar energy plants.

What is a battery energy storage system (BESS)?

The amount of renewable energy capacity added to energy systems around the world grew by 50% in 2023, reaching almost 510 gigawatts. In this rapidly evolving landscape, Battery Energy Storage Systems (BESS) have emerged as a pivotal technology, offering a reliable solution for storing energy and ensuring its availability when needed.

Why should you choose a containerized energy system?

The modular nature of containerized systems often results in lower installation and maintenance costs compared to traditional setups. And when you can store up energy when it's inexpensive and then release it when energy prices are high, you can easily reduce energy costs.

## Energy Storage Container Technology

### LIQUID COOLING ENERGY STORAGE SYSTEM

EMS real-time monitoring  
No container design  
flexible site layout

Cycle Life  
**≥8000**

Nominal Energy  
**200kwh**

IP Grade  
**IP55**
