

SolarMax Energy Systems

Energy Storage Power Station Project Solution

Overview

What is energy storage technology?

Energy storage technology allows for a flexible grid with enhanced reliability and power quality. Due to the rising demand for energy storage, propelled further by the need for renewable energy supply at peak times, energy storage facilities and producers have grown tremendously in recent years.

Why is energy storage important?

Energy storage plays a pivotal role in the energy transition and is key to securing constant renewable energy supply to power systems, regardless of weather conditions. Energy storage technology allows for a flexible grid with enhanced reliability and power quality.

How will a pumped storage power plant contribute to the energy transition?

The company is making a significant contribution to the energy transition and is continuing its corporate transformation towards more renewable energy generation. By storing energy, the pumped storage power plant will contribute to greater security of supply in southern Germany.

How many energy storage projects are there in the world?

It has 9.4GW of energy storage to its name with more than 225 energy storage projects scattered across the globe, operating in 47 markets. It also operates 24.1GW of AI-optimised renewables and storage, applied in some of the most demanding industrial applications.

What is a hybrid energy storage system?

The storage system is comprised of individual components that are already in regular production by the project partners. The HyFlow project partners have also developed advanced and more adaptable energy management systems for the new hybrid energy storage system.

Why should we invest in a pumped storage power plant?

By storing energy, the pumped storage power plant will contribute to greater security of supply in southern Germany. This investment is part of our previously announced strategy to invest in growth and transformation towards a greener business.

Energy Storage Power Station Project Solution

Sineng Electric to supply energy storage solutions for sodium-ion ...

The project is China's first 100-MWh-scale energy storage power station to utilize sodium-ion batteries. Developed and managed by Datang Hubei Energy Development, the ...
