

## SolarMax Energy Systems

# Energy Storage Service Projects

## Overview

---

What is energy storage technology?

Energy storage technology allows for a flexible grid with enhanced reliability and power quality. Due to the rising demand for energy storage, propelled further by the need for renewable energy supply at peak times, energy storage facilities and producers have grown tremendously in recent years.

How many energy storage projects are there in the world?

It has 9.4GW of energy storage to its name with more than 225 energy storage projects scattered across the globe, operating in 47 markets. It also operates 24.1GW of AI-optimised renewables and storage, applied in some of the most demanding industrial applications.

How will a pumped storage power plant contribute to the energy transition?

The company is making a significant contribution to the energy transition and is continuing its corporate transformation towards more renewable energy generation. By storing energy, the pumped storage power plant will contribute to greater security of supply in southern Germany.

What is Daggett solar power facility – battery energy storage system?

The Daggett Solar Power Facility – Battery Energy Storage System is a 450,000kW lithium-ion battery energy storage project located in San Bernardino, California, the US. The electro-chemical battery storage project uses lithium-ion battery storage technology. The project was announced in 2019 and will be commissioned in 2024.

Why is energy storage important?

Energy storage serves important grid functions, including time-shifting energy across hours, days, weeks, or months; regulating grid frequency; and ensuring flexibility to balance supply and demand.

Which energy storage project uses lithium-ion battery storage technology?

The electro-chemical battery storage project uses lithium-ion battery storage technology. The project was announced in 2019 and will be commissioned in 2021. The project is owned and developed by Florida Power & Light. Buy the profile [here](#). For more details on the latest energy storage projects, buy the project profiles [here](#).
