Energy storage and new energy value 10 billion

Overview

What is the growth rate of the energy storage industry?

The energy storage industry recorded an annual growth rate of 5.69% with sustained market momentum of innovation, global demand, and clean energy policies. The market is valued at USD 288.97 billion in 2025 and is projected to reach USD 569.39 billion by 2034 with a 7.87% compound annual growth rate (CAGR) for 2025–2034.

How much did energy storage invest in 2023?

Meanwhile, although as a share of the total energy storage's US\$36 billion of investment commitments during 2023 seems relatively small, it was a jump of 76%. Storage investments totalled more dollars than hydrogen (US\$10.4 billion) and carbon capture and storage (US\$11.1 billion) together.

How can energy storage support the global transition to clean electricity?

To support the global transition to clean electricity, funding for development of energy storage projects is required. Pumped hydro, batteries, hydrogen, and thermal storage are a few of the technologies currently in the spotlight.

How much money has been invested in energy transition technologies?

It found that total investment in energy transition technologies including renewables, hydrogen, electric vehicles (EVs) and carbon capture and storage hit record levels last year, with US\$1.77 trillion total investment, a 17% increase from 2022.

Who are the top investors in the energy storage industry?

The top investors in the energy storage industry have collectively contributed more than USD 34.1 billion to the sector. Here's a breakdown of the leading contributors: Rabobank has supported 268 companies with USD 5 billion, supporting the expansion of large-scale energy storage like 420 MWh. KKR has deployed USD 4.4 billion into 11 companies.

Is China entering a new era of energy storage demand?

Mainland China accounts for most of the global energy storage demand, driven in the near term by regional requirements for new utility-scale wind and solar projects to include energy storage capacity. However, the Chinese market is entering an era of change.
