

## SolarMax Energy Systems

# Energy storage bc battery

## Overview

---

This project uses a battery energy storage system (BESS) to help a facility avoid costly power infrastructure upgrades. By strategically managing energy use, it reduces peak demand on the grid and participates in the BC Hydro ESI program for cost savings. What is a battery energy storage system (BESS)?

This project uses a battery energy storage system (BESS) to help a facility avoid costly power infrastructure upgrades. By strategically managing energy use, it reduces peak demand on the grid and participates in the BC Hydro ESI program for cost savings.

What is BC Hydro energy storage incentive (ESI)?

The BC Hydro Energy Storage Incentive (ESI) program played a crucial role in enabling this project to implement a Moment Energy battery energy storage system (BESS). By financing 80% of the project cost, the ESI program facilitated the customer's ability to adopt energy storage technology and reduce their energy costs.

Does BC Hydro pay for battery installation?

Ensure uninterrupted operations during outages without relying on diesel generators. Fund up to 80% of your battery installation costs through BC Hydro's incentive. At Energy Economics, we specialize in designing and installing large-scale renewable energy and storage solutions across British Columbia.

Do battery energy storage systems need to be approved?

All battery energy storage systems must be approved by BC Hydro before installation to ensure safety and effective operation – even if your battery will not be sending power to our grid. It is important for BC Hydro's crews and other service providers to know if there is a battery onsite to ensure they can work safely.

How much does a BC Hydro energy storage system cost?

Up to \$25,000 for energy storage systems [ (\$500 per kWh, capped at 50% of total cost (including the material and labour cost)]. By participating in BC Hydro's self-generation program, businesses gain greater control over their energy use, contributing to sustainability and cost savings.

Does BC Hydro have a battery onsite?

It is important for BC Hydro's crews and other service providers to know if there is a battery onsite to ensure they can work safely. If you're interested in connecting a small (less than 100 kW) battery energy storage system, apply for connection through the self-generation program.
