

SolarMax Energy Systems

Energy storage equipment installed at South African airports

Overview

Where will solar PV plants be located in South Africa?

Image: Olga Ernst, Wikimedia Commons Airports Company South Africa (ACSA) has issued a tender for three solar PV plants to be located at three different airports in the country. The three proposed projects will be based at Tambo International Airport, King Shaka International Airport, and Cape Town International Airport.

What does the Just Energy Transition mean for South Africa?

The Just Energy Transition provides an unprecedented chance for South Africa to diversify its energy sources, build a thriving green economy, and create sustainable jobs. However, a balanced and inclusive approach is essential to maximise these benefits for all stakeholders.

What is a battery energy storage system?

This is where Battery Energy Storage Systems (BESS) come in, offering a critical solution to stabilise renewable power and support grid reliability. BESS – The Solution for Renewable Reliability As renewable energy projects continue to grow, challenges remain due to the intermittent nature of renewables.

What is battery energy storage systems (Bess)?

While these advancements have reduced reliance on fossil fuels and created new jobs, renewable energy still represents a small proportion of South Africa's overall energy mix. This is where Battery Energy Storage Systems (BESS) come in, offering a critical solution to stabilise renewable power and support grid reliability.

Why is Eskom implementing Bess in Africa?

Eskom is currently implementing Africa's largest rollout of BESS, a promising step toward stabilising grid capacity. However, this initiative faces significant

hurdles, particularly global supply shortages that limit growth and effectiveness. Supply Chain Disruptions – A Persistent Challenge
