

## SolarMax Energy Systems

# Energy storage system lithium battery OEM

### Power Conversion System

- Single-stage three-level modularization
- Multi-branch input to reduce battery series and parallels connection

## Overview

---

Are lithium-ion batteries safe for electric energy storage systems?

To cover specific lithium-ion battery risks for electric energy storage systems, IEC has recently published IEC 63056 (see Table A 13). It includes specific safety requirements for lithium-ion batteries used in electrical energy storage systems under the assumption that the battery has been tested according to BS EN 62619.

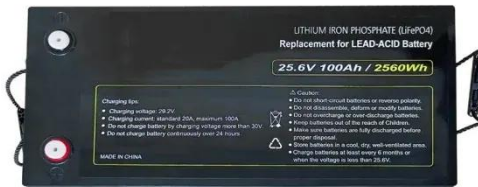

What is a lithium battery energy storage system?

A Lithium-ion Lifepo4 Battery Energy Storage System is a large-scale system, such as 300kWh or 500kWh, that stores power when the power is surplus and outputs the stored power to the grid through the inverter when the power is insufficient.

What is the containerized lithium battery energy storage system?

The containerized lithium battery energy storage system is based on a 40-foot standard container, and the lithium iron phosphate battery system, PCS, BMS, EMS, air conditioning system, fire protection system, power distribution system, etc. are gathered in a special box to achieve high integration.

## Energy storage system lithium battery OEM

### Shop , SHANGHAI ELECNova ENERGY STORAGE CO., LTD.

Energy Storage Battery Management System The energy storage BMS solution supports two modes: a three-level architecture (BMU sub-control module + BCU main control module + ...
