

SolarMax Energy Systems

Estonia Photovoltaic Solar System Inquiry

Overview

How much solar power does Estonia have per capita?

Regarding solar power per capita, Estonia has emerged as one of the new leaders. The country is ranked 6th among 27 EU members, with 596 Watt per capita in 2022, jumping from 405 in 2021. With accelerated growth in recent years, it has the potential to reach an even higher mark soon.

How much PV capacity does Estonia have?

According to Andres Meesak, CEO of Estonia's PV association, Estonia now has around 107 MW of cumulative installed PV capacity. This represents a significant increase from the 17 MW of cumulative capacity at the end of 2017.

Did Estonia introduce a new solar policy?

Yes, Estonia introduced a new policy for solar and renewables in June 2018. This policy led to the deployment of approximately 90 MW of solar power, bringing the cumulative capacity to around 107 MW by the end of 2018.

Will direct line PPAs help Estonia adopt solar?

Last year, Estonia installed 90 MW of PV, which is four times more than it had done since it began adopting solar. The growth was mainly due to a new regulation issued by the government in June and the big push came mainly from small installations. Direct line PPAs will be crucial to the adoption of utility-scale PV in Estonia.

How many solar roofs does Solarstone install in 2022?

The company was founded in 2015 and has installed over 700 solar roofs in eight countries. In July 2022, Solarstone raised €10 million to fund European expansion. According to the report, the EU's total solar power capacity grew by 25%, from 167.5 GW in 2021 to 208.9 GW in 2022.
