

## SolarMax Energy Systems

# European assembled outdoor power supply

**12.8V6Ah**

Nominal voltage (V):12.8  
Nominal capacity (ah):6  
Rated energy (WH):76.8  
Maximum charging voltage (V):14.6  
Maximum charging current (a):6  
Floating charge voltage (V):13.6~13.8  
Maximum continuous discharge current (a):10  
Maximum peak discharge current @10 seconds (a):20  
Maximum load power (W):100  
Discharge cut-off voltage (V):10.8  
Charging temperature (°C):0~+50  
Discharge temperature (°C): -20~+60  
Working humidity: <95% R.H (non condensing)  
Number of cycles (25 °C, 0.5c, 100%dod): >2000  
Cell combination mode: 32700-4s1p  
Terminal specification: T2 (6.3mm)  
Protection grade: IP65  
Overall dimension (mm):90\*70\*107mm  
Reference weight (kg):0.7  
Certification: un38.3/msds

## Overview

---

How to choose a portable power station in Europe?

Portability is a crucial factor when selecting a portable power station in Europe, as the weight and design directly influence how easily you can transport it. The weight of these units can vary significantly, with lightweight models around 25 pounds being much easier to carry compared to heavier options that exceed 100 pounds.

What factors affect your experience with portable power stations in Europe?

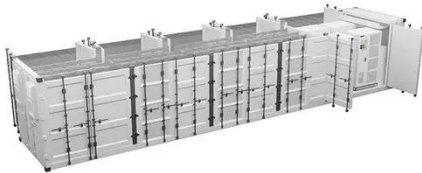

Often overlooked, battery capacity and type are fundamental factors that can significantly impact your experience with portable power stations in Europe. Battery capacity is typically measured in watt-hours (Wh), with higher capacities—like 3600Wh to 5120Wh—allowing for longer usage of your devices without needing to recharge.

How do I choose a power supply?

First, think about the total output power; options typically range from around 500W to over 7000W. This range directly impacts the types of devices you can power simultaneously. Next, look for the number and variety of output ports.
