Finland lithium battery battery pack

Overview

What is a battery from Finland project?

Batteries from Finland -project is enhancing the growth of knowledge basis and global competitiveness along the entire battery value chain – from raw material production to battery cell production, battery applications and recycling. The study was commissioned by Business Finland and jointly executed by Gaia Consulting and Spinverse. WHY FINLAND?

.

When will Finland start producing lithium ion batteries?

Therefore, Finland continues to increase its raw material capabilities, with Keliber planning to start mining and concentrating lithium ore in 2024, and Fortum expecting to start operating its lithium-ion battery recycling plant in 2023 .

Is Finland a good operational environment for Li-ion batteries?

The attractiveness of Finland as operational environment for COMPANIES currently active within the Li-ion battery value chain in Finland was mainly considered as somewhat attractive or attractive covering together 81% of the company representative answers.

Is Finland a leader in lithium-ion battery supply chain?

The rise has been steady from 2020 onward; back then, Finland ranked 8th worldwide and 3rd Europewide. Even more impressive is that Finland has outperformed its expected rankings of 2025 (7th worldwide, 3rd Europewide) . Worldwide rankings of the top 30 countries involved in global lithium-ion battery supply chain .

Why is Finland a good battery supplier?

Worldwide rankings of the top 30 countries involved in global lithium-ion

battery supply chain . The reasons for Finland's success can be explained by its increasing battery metals manufacturing, relatively clean grid as well as excellent infrastructure.

Does Finland have a top 4 battery metal industry?

Top 4 ranking cannot be stated as a coincidence since Finland has strengthened its already strong battery metal industry by launching National Battery Strategy 2025 in June 2021 .
