

SolarMax Energy Systems

Flexible photovoltaic module film

Overview

Flexible panels use thin-film solar cells, which are made of various semiconductor materials. These thin films can be as thin as a few micrometers, whereas traditional panels use thicker silicon wafers. For this reason, they're thin, lightweight, and bendable.

Flexible photovoltaic module film

Thin-Film Solar Technology

PowerFilm's flagship thin-film material is based on Amorphous Silicon (a-Si) PV technology. This technology is highly flexible, durable, lightweight, and has ...

Home Energy Storage (Stackble system)

Product Introduction

- Scalable from 10 kWh to 50 kWh
- Self Consumption Optimization
- Integrated with inverter to avoid the compatibility problem
- LFP battery, safest and long cycle life
- Stackble design, effortless installation
- Capable of High-Powered Emergency-Backup and Off-Grid Function

Photovoltaic & Solar Tape Solutions , Saint-Gobain

Superior light transmission and low glare surface treatment make our ETFE film the right choice for flexible and rigid modules thanks to optimum energy generation and superior aesthetic ...
