

SolarMax Energy Systems

Foreign communication base station inverter grid-connected brand

Overview

Are undocumented communication devices hidden in Chinese-made solar inverters?

This investigative article exposes the discovery of undocumented communication devices hidden in Chinese-made solar inverters, creating unprecedented vulnerabilities in global power grids.

What is a grid-connected inverter?

Grid-connected inverters play a pivotal role in decentralized energy generation. They are the key element for integrating renewable energy into our power grids.

Are 'rogue' communication devices hidden inside solar power inverters?

In a discovery that has sent shockwaves through the cybersecurity community, U.S. energy officials have found undocumented "rogue" communication devices hidden inside solar power inverters imported from China.

Which companies dominate the global inverter market?

Huawei, Sungrow, and Ginlong Solis—three Chinese firms—lead the global inverter market. Huawei alone accounted for 29% of global shipments in 2022. While it exited the U.S. inverter market in 2019, it continues to supply other countries at scale.

Where are power inverters made?

Undocumented components found in power inverters Power inverters, predominantly manufactured in China and used globally to connect solar panels and wind turbines to power grids, as well as in batteries, heat pumps and EV chargers, are under scrutiny.

Do inverters need to be connected to public power grids?

A prerequisite for connection to public power grids is the verification and confirmation that these inverters meet the required standards, norms, and specifications.

Foreign communication base station inverter grid-connected brand

Smart BaseStation

Smart BaseStation(TM) is an innovative, fully-integrated off-grid solution, that can provide power for a range of applications. It is the ideal turnkey solution for the ...
