

## SolarMax Energy Systems

# Four electric energy storage project investment companies in Somalia

## Overview

---

Which companies provide off-grid solar energy solutions in Somalia?

In addition, several other companies exist that provide off-grid solar energy solutions, including Blue Sky, Solargen, Delta, and others. Financing represents the biggest obstacle to Somalia realizing its potential as a hub for renewable energy. International development partners are providing support in the solar energy sector.

Where can a large capacity power plant be built in Somalia?

With no large-scale production, the Federal Government of Somalia (FGS) is looking to establish, through PPPs, large capacity electricity generation, particularly at the larger population centers: • Mogadishu • Hargeisa • Kismayo • Baidoa • Beletweyn • Dhusamareeb • Garowe Source: FGS Public-Private Partnerships (PPPs).

How much does electricity cost in Somalia?

Regarding costs per kilowatt-hour of electricity, Somalia has one of the highest unit prices in Africa. Somalia has higher tariffs than neighboring countries Kenya and Ethiopia, ranging from 50-125 cents/kWh compared to 0.15 cents/kWh in Kenya and 0.6 cents/kWh in Ethiopia. Somalia's energy sector is considered promising for growth and investment.

What is the value accumulation chain for the energy sector in Somalia?

Value accumulation chain for the energy sector in Somalia Somalia needs 200MW+ of renewable energy installed and 10+ modern city grids in place within the next decade. This unlocks multiple opportunities for: • Specialist developers • Electrical utilities • Major technology companies.

Why is electricity so important in Somalia?

Strong demand for affordable electricity: The need for cheaper and reliable electricity throughout Somalia is high and growing, as evidenced by the

expansion of independent power providers and the establishment of microgrids in a growing number of cities. As a largely agricultural economy, demand is high in the dairy and fisheries sectors.

What is the potential for wind energy in Somalia?

Wind speeds are near 20 miles per hour on average, which makes Somalia Africa's highest potential for wind energy, particularly along the coastline. Estimated generation potential in only four KM<sup>2</sup> could produce as much as the entire diesel and hybrid generation.

## Four electric energy storage project investment companies in Somalia
