# French Electric Network Company 5G base station

## Overview

---

Which telco has the largest 5G network in France?

To know more: Having deployed France's largest 5G network by number of base stations, Free is today announcing that it has become the country's first telco to offer 5G 3.5 GHz SA (Standalone Access) on its public network on a national scale.

Does free have 5G in France?

Available in almost 10,500 municipalities, it already covers nearly 95% of the French population. Today, Free is announcing that it has deployed 5G SA (Standalone Access) on the 3.5 GHz frequencies of its public network on a national scale. By doing this, it has become the first mobile operator in France to offer this technology to its subscribers.

Is 5G coming to France?

After a long wait and much controversy, 5G has finally arrived in France. Since its deployment in November 2020, 5G sites and antennas have multiplied all over the French territory and the transition to the new generation of mobile phone standards was initiated. Have you ever heard of 5G?

.

What is a 5G base station?

A 5G network base-station connects other wireless devices to a central hub. A look at 5G base-station architecture includes various equipment, such as a 5G base station power amplifier, which converts signals from RF antennas to BUU cabinets (baseband unit in wireless stations).

What is 5G SA?

5G SA is a 5G network that uses fully dedicated and standalone infrastructure and does not rely on any 4G infrastructure, unlike 5G NSA (Non-Standalone

Access), which is built on existing 4G core network infrastructure with 5G laid on top. The best of 5G.

Which companies are deploying indoor 5G in the industrial sector?

Schneider Electric, a leader in digital transformation, energy management and automation, and Orange, a global telecoms operator and leader in digital services, announced the first deployment of indoor 5G in the industrial sector in France on experimental frequencies as part of a trial.
