

SolarMax Energy Systems

French energy storage project design unit

Overview

Who is delivering a battery energy storage system in France?

China's Envision Energy has been selected by Kallista Energy to deliver a 120 MW/240 MWh battery energy storage system (BESS) in Saleux, northern France. The project represents Envision's first independent storage contract in the French market and signals its continued European expansion.

What is the largest European battery-based energy storage project?

In May 2023, we launched our largest European battery-based energy storage project at the Antwerp platform in Belgium. With its 40 containers, the site will develop a capacity of 75 MWh, which is equivalent to the daily consumption of almost 10,000 homes.

What makes envision a good energy storage company?

Built with a strong emphasis on proven design, safety, and long-term reliability, Envision's energy storage products are engineered for secure and dependable performance across their lifecycle, supporting the transition to a flexible, resilient, and net-zero energy future.

What is Envision Energy's 'Saleux' project?

The Saleux site will use Envision Energy's direct current (DC), alternating current (AC) and power conversion systems (PCS) to provide the power grid with frequency regulation services on the French transmission system operator RTE's reserve markets.
