

SolarMax Energy Systems

French solar power generation system

Overview

Feed-in tariffs France is aiming to increase its solar PV capacity from 11.5 GW in March 2021 to 23 GW by the end of 2023. The country offers feed-in tariffs for small-scale solar PV up to 100 kWp on rooftops for self-consumption, with a specific grid tariff for collective users and exemption from the domestic tax on.

Solar power in France including overseas territories reached an installed capacity figure of 24.5 gigawatts (GW) at the end of 2023, up from 17.1 GW at the end of 2022 and just 11.2 GW in 2020. The country currently has the .

Solar PV installations in France started being substantial only from around 2008. Between 2009 and 2011 PV capacity grew almost tenfold, from a relatively low level. In its 2014 report.

• • • • •

France has solidified its leadership in solar energy capacity by reaching 23.7 GW as of September 30, 2024. This growth also boosted solar electricity production to 21.1 TWh, thus accounting for 6.2% of the country's total electricity consumption and showcasing its commitment to renewable energy.
