

## SolarMax Energy Systems

# German photovoltaic panel power generation prices

## Overview

---

The levelized cost of energy (LCOE) of solar PV in Germany currently ranges from €0.041 (\$0.049)/kWh to €0.144/kWh, according to a new report from the Fraunhofer Institute for Solar Energy Systems (Fraunhofer ISE). How much electricity does a photovoltaic system generate in Germany?

In Germany, photovoltaic (PV) systems typically generate around 1,000 kilowatts on average of electricity per kilowatt peak (kWp) per year. 2 As of February 2024, the average household electricity price in Germany was 42.22 cents per kilowatt hour (kWh). 3.

Do solar panels contribute to Germany's Power Mix?

Solar arrays can contribute a much greater share to the German power mix during particularly sunny times. In July 2024, Germany recorded its monthly record solar power output level to date of 10.1 terawatt hours (TWh) – despite sunshine levels being lower than the previous year.

Are photovoltaics a good idea in Germany?

Photovoltaics installed in Germany have eliminated this problem and can also ease such situations in neighboring countries such as France, because they fundamentally reduce the load on fossil and nuclear power plants, especially on summer days.

What data is gathered in the German PV price monitoring?

The data stems from interviews with solar installation companies and an evaluation of offers made to end consumers on online portals. The following data is gathered in the German PV Price Monitoring: Split of turn key costs of < 30 kWp rooftop systems in different cost components.

Does Germany have more solar power than consumer demand?

Germany has installed more solar capacity than consumer demand requires, SEB Research found. During peak solar production hours, producers have

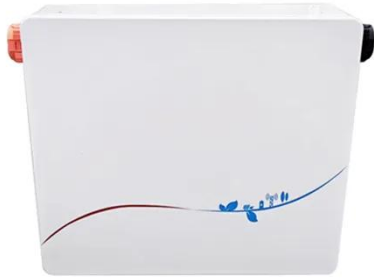

taken a 87% price cut in the past 10 days. In fact, raw market energy prices fall into negative territory during these hours.

How much does a rooftop PV system cost in Germany?

From pv magazine Germany The average system price for rooftop PV systems in German single-family homes with and without battery storage rose by around 10% to €1,557 (\$1,711)/kW in the second quarter of 2023, in comparison with the first quarter of the year. The prices are 21.9% higher than the second quarter of 2022 when they stood at €1,277/kW.
