Germany station communication base station hybrid energy

Overview

Can small base stations conserve grid energy in hybrid-energy heterogeneous cellular networks?

Abstract: Dense deployment of small base stations (SBSs) within the coverage of macro base station (MBS) has been spotlighted as a promising solution to conserve grid energy in hybrid-energy heterogeneous cellular networks (HCNs), which caters to the rapidly increasing demand of mobile user (MUs).

What makes TB4 a good base station?

TB4 is a hybrid base station, with both TETRA and 4G/5G technologies in one base station. This allows operators flexibility - TB4 offers smooth evolution to broadband services. Nokia AirScale's energy efficiency offers significant savings for critical operators. Operating expenses (OPEX) play an important role in the long term.

Can hybrid-energy hcns maximize EE?

It is shown that the proposed scheme outperforms other schemes and can also maximize the EE in hybrid-energy HCNs.
