

## SolarMax Energy Systems

# Greece s new energy storage subsidies

## Overview

---

Greece has launched its third and final tender under a 1-GW program to support standalone battery energy storage systems (BESS), aiming to allocate 200 MW of capacity with available subsidies of EUR 200,000 (USD 217,920) per MWh. Does Greece have a battery storage subsidy program?

Greece's latest auction has awarded subsidies to 188.9 MW of standalone, front-of-the-meter, utility-scale battery energy storage. The auction was the third and final edition of a battery storage subsidy program launched in 2023, with the country now turning its focus towards a new 4.7 GW unsubsidized BESS scheme.

Does Greece have a Bess subsidy program?

Moving forward, Greece is abandoning subsidizing BESS via auctions. Instead, the country has recently launched a new program for 4.7 GW of unsubsidized BESS which will be offered priority grid connections on a merchant basis without subsidy support. How will Greece's energy savings scheme work?

The scheme will be backed with funding from Greece's Recovery and Resilience Facility. A guide to the programme is available on the Ministry's website. According to the government's estimates, beneficiaries of the scheme will lower their electricity bills by up to EUR 3,000 per year.

How many MW of storage will Greece need by 2030?

The majority of the projects (2,650 MW) belong to Group Γ and will connect to ADMIE as follows per region. A key factor driving companies is that this large capacity will cover all the storage needs Greece will require by 2030.

Why is Greece focusing on energy storage?

Greece has been actively focusing on energy storage since the emergence of

the RES “boom” in 2020. The country recognised the pivotal role of energy storage in the energy transition and emphasised its importance in the first iteration of the country’s National Energy and Climate Plan in 2019.

What is the energy storage for businesses program?

The Greek Ministry of Environment and Energy launched the Energy Storage for Businesses program with subsidies for installing batteries.
