

## SolarMax Energy Systems

# Guatemala power generation side energy storage power station solution

## Overview

---

When will Guatemala's first natural gas power plant be completed?

The project, slated for completion in 2025, marks a significant milestone in Guatemala's energy landscape as it introduces the country's first mid-scale power plant operating on natural gas.

Does Guatemala have a natural gas power plant?

In a pioneering move for the region, the power plant will utilize locally produced natural gas. This departure from imported coal, diesel, or heavy fuel oil commonly used in Guatemala underscores the commitment to environmental sustainability.

Is Guatemala a leader in environmentally conscious energy production in Central America?

This move aligns with Guatemala's commitment to lower CO2 levels and positions the country as a leader in environmentally conscious energy production in Central America. "This latest project represents a 60% increase in CEC's installed capacity in Guatemala and over 200% in energy.
