

## SolarMax Energy Systems

# Heishan Energy Storage Photovoltaic Project Design

## Overview

---

What is photovoltaic & energy storage system construction scheme?

In the design of the “photovoltaic + energy storage” system construction scheme studied, photovoltaic power generation system and energy storage system cooperate with each other to complete grid-connected power generation.

How to optimize a photovoltaics energy storage value chain system?

Construct a photovoltaics energy storage value chain system named PVESS innovatively. Design a HESS optimization strategy combined with BESS and SMES for PVESS. Propose an effective method for optimal management of HESS based on HPSO and VIKOR. Recommend a hybrid approach to optimize the sizing of PVESS-HESS hybrid system.

What is a 50 MW photovoltaic + energy storage power generation system?

A 50 MW “photovoltaic + energy storage” power generation system is designed. The operation performance of the power generation system is studied from various angles. The economic and environmental benefits in the life cycle of the system are explored. The carbon emission that can be saved by power generation system is calculated.

How does an energy storage system work with a photovoltaic system?

Multiple requests from the same IP address are counted as one view. An energy storage system works in sync with a photovoltaic system to effectively alleviate the intermittency in the photovoltaic output.

How to estimate the cost of a photovoltaic & energy storage system?

When estimating the cost of the “photovoltaic + energy storage” system in this project, since the construction of the power station is based on the original site of the existing thermal power unit, it is necessary to consider the impact of depreciation, site, labor, tax and other relevant parameters on the

actual cost.

Is PV power generation synergistic management based on a value chain?

This paper studies the synergistic management of PV power generation based on the perspective of value chain, and constructs a complex value chain system with PV power generation subsystem and energy storage subsystem as the key subsystem—photovoltaics energy storage system (PVESS).
