

## SolarMax Energy Systems

# Home energy storage discharge storage

## Overview

---

What is a battery energy storage system?

Battery energy storage systems (BESS) stabilize the electrical grid, ensuring a steady flow of power to homes and businesses regardless of fluctuations from varied energy sources or other disruptions. However, fires at some BESS installations have caused concern in communities considering BESS as a method to support their grids.

How does the Bess's discharge strategy compare with the yearly saved energy?

The best way to compare the discharge strategies is to examine the yearly saved energy and the BESS's saved energy amount in winter. The yearly discharged energy was decreased only by 5%, however, the peak-time discharged energy was increased by more than 18% in winter ( Fig. 16 ).

What happened at Gateway energy storage facility?

On May 15, 2024, Gateway Energy Storage Facility in San Diego, California, experienced a BESS fire with continued flare-ups for seven days following the fire. The facility held about 15,000 nickel manganese cobalt lithium-ion batteries.

### Home Energy Storage (Stackble system)

High Efficiency

Easy installation

Safe and Reliable

Perfect Compatibility

#### Product Introduction

- Scalable from 10 kWh to 50 kWh
- Self-Consumption Optimization
- Integrated with inverter to avoid the compatibility problem

- LFP Battery: safest and long cycle life
- Stackable design: effortless installation
- Capable of High-Powered Emergency Backup and Off-Grid Function
