

## SolarMax Energy Systems

# Honduras Industrial Power Peak Shaving Energy Storage

**TAX FREE**

## ENERGY STORAGE SYSTEM

### Product Model

HJ-ESS-215A(100KW/215KWh)  
HJ-ESS-115A(50KW 115KWh)

### Dimensions

1600\*1280\*2200mm  
1600\*1200\*2000mm

### Rated Battery Capacity

215KWH/115KWH

### Battery Cooling Method

Air Cooled/Liquid Cooled

## Overview

---

Is peak shaving a good energy management technique?

This technique not only helps to reduce energy costs but also ensures reliable power supply during times of high demand. Overall, peak shaving is an effective energy management technique that can help consumers save money and reduce their carbon footprint.

How can a facility reduce energy consumption during peak shaving?

To implement peak shaving, a facility can temporarily reduce energy consumption by scaling down production or activating an on-site power generation system. Another option is to rely on a backup battery to provide power during peak hours.

Does es capacity enhance peak shaving and frequency regulation capacity?

However, the demand for ES capacity to enhance the peak shaving and frequency regulation capability of power systems with high penetration of RE has not been clarified at present. In this context, this study provides an approach to analyzing the ES demand capacity for peak shaving and frequency regulation.

What is the power and capacity of Es peaking demand?

Taking the 49.5% RE penetration system as an example, the power and capacity of the ES peaking demand at a 90% confidence level are 1358 MW and 4122 MWh, respectively, while the power and capacity of the ES frequency regulation demand are 478 MW and 47 MWh, respectively.

## Honduras Industrial Power Peak Shaving Energy Storage

### San Pedro Sula Peaking Energy Storage Project Powering Honduras

In a country where 38% of electricity still comes from fossil fuels, Honduras faces urgent energy challenges. The San Pedro Sula Peaking Energy Storage Project emerges as a game ...
