

## SolarMax Energy Systems

# How far apart should the battery cabinets be installed

## Overview

---

Must be at least 3 feet apart from each other and any windows, doors, or gas meters. That means, for one battery system, you must have 9 feet of total working space. For a two battery system, you must have 15 feet of total working space. Should be installed within 20 feet of the electrical meter. Should I keep the batteries close to the inverter?

I'd recommend keeping the batteries close to the inverter. Your costs would be astronomical for appropriately sized DC lines of that length. Efficiency would also suffer. Just have two separately located battery banks if you require battery support for both inverters. Yep 150' , but you'll need cable as thick as your forearm lol.

How long does it take to install a battery storage system?

Who is qualified to install your battery storage system. The installation process for a battery storage system is usually very straightforward and only takes around 1-2 days (unless you are having a large system installed).

Should batteries be installed inside or outside?

Some should be installed inside, while others should be installed outside. You may also choose to install multiple batteries to increase your storage capacity and are usually installed outside or in a utility room (e.g. garage or basement) as they vent hydrogen when charged. Some batteries (usually lithium batteries) are designed to be wall mounted inside.

What are the safety requirements related to batteries & Battery rooms?

Employers must consider exposure to these hazards when developing safe work practices and selecting personal protective equipment (PPE). That is where Article 320, Safety Requirements Related to Batteries and Battery Rooms comes in.

How do I install a battery storage system?

install battery storage systems  
**INSTALL YOUR SYSTEM**  
The first thing to do when having a battery storage system installed is to ask to see the installer's Clean Energy Council Accredited Installer card. This shows that the install.

Can I move my battery storage system to a new home?

the new standard, you won't be able to reinstall it. Therefore, while it is technically possible to move your battery storage system to a new residence, you should check before you move that you will be able to reinstall the system. If the system is to be moved, it must be carefully dismantled and reinstalled
