How many 5G base stations does Austrian Communications have

Overview

Will Austria start a 5G network in 2022?

Austria already looks set to advance with standalone (SA) 5G networks, with Drei Austria recently announcing a trial in the capital Vienna and plans to launch a commercial 5G SA network in spring 2022. Notably, operators have complained that the high cost of mobile mast rental has slowed 5G rollout.

How fast is Drei Austria's 5G network in Q1-Q2 2021?

Within the capital Vienna, Drei Austria's 5G network showed the fastest performance during Q1-Q2 2021 achieving a median download speed of 193.66 Mbps. Austria has clearly seen a ramp up in mobile network speeds with the arrival of 5G. We'll be interested to see if other providers make the necessary investments to catch up to Drei.

Is Austria a pioneering 5G market?

Austria has been held up as an example of a pioneer European 5G-market, having announced its 5G Strategy in April 2018, which has since been incorporated in the nation's Broadband Strategy 2030.

How many 5G base stations are there in China?

In data collected between July 2022 and June 2024, China was reported to have had around 3.5 million 5G base stations installed across the country, with Chinese mobile operators investing heavily in 5G infrastructure. By comparison, the European Union had around 460,000 thousand base stations, while the United States had approximately 175,000.

Who has the fastest 5G download speed in Austria?

5G performance varied widely among Austria's top providers during Q1-Q2 2021 but Drei Austria had the fastest median 5G download speed at 183.04 Mbps. Accounting for statistical uncertainty, this was at least 21% faster than the nearest competitor.

How many base stations will 5G have in 2025?

The U.S. has ambitious plans for 5G expansion, aiming to have more than 300,000 active base stations by 2025. This goal is being driven by investment from private telecom providers and government initiatives like the Rural 5G Fund. For businesses in the U.S., this means increasing access to high-speed connectivity.
