# How many solar panels are installed in cities

ESS

## Overview

---

How many solar panels are there in the United States?

Solar power has been growing rapidly in the U.S. for the past decade, and there are now more than 160 gigawatts of solar panels installed across the country. Here are some quick statistics about solar energy in the United States: Note: Data from U.S. Energy Information Administration, October 2024.

How many solar installations are there in the United States?

In that same year, solar energy accounted for 55 percent of new electricity-generating capacity additions in the North American country. Of the total solar capacity installed in the U.S., over 26 percent corresponds to residential installations. This segment has grown in recent years, reaching some 4.7 million installations in 2023.

Which city has the most solar panels?

San Jose, California Shining bright at the top of this year's rankings is the Hawaiian city of Honolulu with more than 1,000 watts of solar photovoltaic (PV) capacity per person – the equivalent of over three solar panels each.

Are cities investing in solar energy?

Many cities in the US enjoy an abundance of sunshine all year round, and according to a new report they are taking advantage of that. The eighth Shining Cities survey from Environment California's Research & Policy Center shows that much of America is investing in solar energy.

What percentage of solar installations are residential?

Of the total solar capacity installed in the U.S., over 26 percent corresponds to residential installations. This segment has grown in recent years, reaching some 4.7 million installations in 2023. Increasing household electricity bills are a large motivator for the installation of residential solar systems.

## Will installers sell more solar in 2025?

Another 28% say they expect to in 2025. At the end of 2023, 54% of installers said they expected to sell more or less solar in 2024. But in this year's survey, only 25% reported that demand had, in fact, increased. Looking ahead to 2025, 78% of installers predict they will sell more solar.
