

SolarMax Energy Systems

How many watts of solar photovoltaic power are there in Sweden

Overview

Sweden has significantly boosted its solar energy capacity, adding 430 megawatts (MW) in the first half of 2025. This impressive growth brings the country's total installed solar capacity to 4.6 gigawatts (GW), further solidifying its commitment to renewable energy. How much power does a photovoltaic system use in Sweden?

In 2023, the total installed power of photovoltaic systems in Sweden amounted to approximately 9,749 watts per square kilometer. This is an increase from 2016, when only around 344 watts per square meter were installed. Get notified via email when this statistic is updated. * For commercial use only Access limited to Free Statistics.

How much solar power does Sweden have in 2023?

This surge includes approximately 67.6 MW from centralized ground-mounted PV parks and 1 533.3 MW from distributed PV systems, predominantly for self-consumption. Total Installed PV Capacity: By the end of 2023, Sweden's total installed PV capacity reached nearly 4 000 MW, a 67% increase from the previous year.

How much solar energy does Sweden generate per capita?

Each year Sweden is generating 152 Watts from solar PV per capita (Sweden ranks 34th in the world for solar PV Watts generated per capita). [source] Are there incentives for businesses to install solar in Sweden?

.

How has the energy price crisis impacted solar panels in Sweden?

The energy price crisis has further accelerated the adoption of solar panel solutions in Sweden. As of August 2022, the average monthly electricity wholesale price reached EUR 190.12/MWh, marking a dramatic increase of approximately 350% from EUR 54.34/MWh in January 2019.

How does Sweden's nuclear power phase-out strategy affect solar power development?

Sweden's ongoing nuclear power phase-out strategy has created a significant opportunity for solar power development in the country's energy mix. Since 2012, there has been more than a 17% decline in electricity generated from nuclear power as the country actively works towards reducing its nuclear dependency.

What is the ideal angle to tilt solar PV panels in Sweden?

So far based on Solar PV Analysis of 167 locations in Sweden, we've discovered that the ideal angle to tilt solar PV panels in Sweden varies between 56° from the horizontal plane facing South in Kiruna and 46° from the horizontal plane facing South in Trelleborg.

How many watts of solar photovoltaic power are there in Sweden

Solar PV potential in Sweden by location

Sweden ranks 36th in the world for cumulative solar PV capacity, with 1,577 total MW's of solar PV installed. This means that 0.70% of Sweden's total energy as a country comes from solar ...
