

## SolarMax Energy Systems

# How much does a solar power generator cost for home use

BMS Wiring Diagram

## Overview

---

The whole house generator cost usually ranges from \$6,000 to \$15,000 in the US. What you pay will depend on your home's size, the generator's output, and how complex the installation is. Smaller setups are cheaper, while full-home systems cost more but offer greater peace of mind. Is a generator cheaper than a solar system?

The article aims to clarify that a generator is not as cheap as it may initially seem. When considering the cost of fuel, the total cost of purchasing and running a generator is roughly equivalent to that of a solar system in the long run, with solar being slightly more expensive in the short term.

How much does a home backup solar generator cost?

A home backup solar generator capable of powering most appliances, keeping your LED lights on, and keeping your electronics charged and running will cost between \$2,000 and \$10,000 depending on capacity, power rating, and included accessories. Let's look at how these choices will impact how much you'll spend.

How much does a solar generator cost?

Good examples include the 6kWh Goal Zero Yeti 6000X, the 4.8kWh Renogy Lycan 5000, and the 5.1kWh BLUETTI EP500. Expect to pay \$5,000-\$8,000 depending on accessories, grid-tie equipment, and solar panel choices. Pre-configured solar generators that can store more than 6kWh of energy are expensive and relatively new.

Is it worth buying a solar generator?

A solar generator is a good purchase if you view it as an emergency backup and not a full replacement for your power needs. It is not a direct replacement for your home's power consumption.

How much power can a solar generator provide?

A high-performing solar generator can provide up to 1,500 continuous watts of power. This is enough energy to charge devices such as a cell phone, tablet, survival radio, a few lights, or a small appliance. However, the actual power output depends on the energy needs of these devices when used together.

How much does a 2kWh solar generator cost?

A basic home 2kWh solar generator will cost you between \$1,600 and \$2,000. You could probably power a couple of appliances, keep lights on and recharge devices with a 2kWh solar generator. Our favorite 2kWh solar generator is the BLUETTI AC200P - or upgrade to the AC200MAX, which can be extended by adding additional power packs.

#### Efficient Higher Revenue

- Max. Efficiency 97.5%
- Max. PV Input Voltage 600V
- 150% Peak Output Power
- 2 MPPT Trackers, 150% DC Input Oversizing
- Max. PV Input Current 16A, Compatible with High-Power Modules

#### Intelligent Simple O&M

- IP66 Protection Degree: support outdoor installation
- Smart I-V Curve Diagnosis Function: locate PV string faults accurately and automatically detect faults
- DC & AC Type II SPD: prevent lightning damage
- Battery Reverse Connection Protection

#### Flexible Abundant Configuration

- Plug & Play, EPS Switching Under 10ms
- Compatible with Lead-Acid and Lithium Batteries
- Max. 6 units Inverters Parallel
- AFCI Function (Optional): when an arc fault is detected the inverter immediately stops operation
