How much does a solar power system cost in South Ossetia

Overview

How much do solar panels cost in South Carolina?

As of April 2024, the average cost for installing a solar panel system in South Carolina is $2.66 per watt. For a typical 5 kW installation, this amounts to approximately $13,291 before incentives, with prices ranging from $11,297 to $15,285. After the federal tax credit, the average price drops by 30%. You'll likely pay less than what we show here.

How much does a 5 kW solar system cost in South Carolina?

In South Carolina, a 5 kW solar system costs $13,291. Keep in mind that the cost per watt ($/W) is used for comparison, so a 10 kW system would cost approximately twice that amount.

How many kWh does a solar system use in South Carolina?

Then, divide your annual kWh by 1,200 to find the system size you need. In South Carolina, the average home uses 12,936 kWh a year, which works out to an 11-kW system. Are solar panels worth it in South Carolina?

.

How much do solar panels cost?

The cost of solar panels in South Carolina is currently lower than the average price of $3.00 per watt across the United States. The size of a solar panel system affects the installation cost, with larger installations having a lower cost per watt due to 'bulk pricing'.

How much does electricity cost in South Carolina?

It's about 25% more expensive than the national average. Your out-of-pocket investment might be higher than in other states, but South Carolina has great incentives to lower the overall cost. The average cost per watt is $2.72 in South Carolina.

Is the cost of solar expensive?

The cost of solar can be influenced by solar incentives, such as the federal solar tax credit. Homeowners in the U.S. can receive a tax credit equal to 30% of the cost of their installed solar panel system.
