

## SolarMax Energy Systems

# How much does a wall mounted solar panel cost

## Overview

---

Solar panels cost between \$2.55 and \$3.15 per watt. For an average 6.5 kW solar system, you'll spend anywhere from \$16,600 to \$20,500 before accounting for tax credits or rebates. How much do solar panels cost?

The price of solar panels changes depending on where you live, but the average for installation is just under \$29,000 or \$2.75 per watt. On the high end, we talked to a solar customer in Hawaii who spent \$100,000 going solar. Dion in Nevada said their 10-kW system cost about \$20,000, which is about the national average price for a 7-kW system.

How much does a home solar system cost?

According to studies by the U.S. Department of Energy, the all-in cost of a home solar panel system is between \$2.74 to \$3.30 per watt. 1,2,12 This figure includes the solar panels, the installation, and other expenses. Using these numbers, an average-sized 8-kilowatt residential solar system would cost between \$21,900 – \$26,400.

How much does it cost to install and manage solar panels?

According to studies by the U.S. Department of Energy, the all-in cost of a home solar panel system is between \$2.74 to \$3.30 per watt. 1,2,12 This figure includes the solar panels, the installation, and other expenses.

Why are wall-mounted solar panels more expensive?

Wall-mounted solar panels can also be more expensive to install than roof-mounted systems because they require extra strong anchors to keep them securely attached. Installers will also probably have easier access to the roof – especially on flat roofs where they can walk about.

How much does a solar system cost per watt?

As of publishing, the average cost per watt is \$2.84. Most solar companies set the price according to the solar system's wattage. A solar installation's "cost

per watt” is a little like the “price per square foot” when you buy a house. It helps compare the value of solar energy systems in different sizes.

Do wall-mounted solar panels need special mounting hardware?

Wall-mounted solar panel systems require special mounting hardware to install vertically. Staging is often necessary since there are more safety considerations than with roof or ground-mounted solar panels. It’s reasonable to assume that higher installation costs will follow when special hardware is necessary for a project.
