# How much does the North African base station energy management system cost

## Overview

---

How much does a building management system cost?

However, there is a constant: Building automation systems can drastically cut energy and operating costs alike. The question on the mind of building operators everywhere, however, is just how much will a building management system (BMS) cost you?

The answer is complicated, but they can range anywhere from \$5,000 to \$250,000.

Can a building management system reduce energy waste?

Building operators in charge of small or medium-sized businesses are right to be wary. Lucky for them, however, there's another option. A building management system can make an incredible difference in your efforts to reduce energy waste in your commercial buildings. Frazier Service Company offers scalable solutions for your BMS system needs.

How much does a building control system cost?

Knowing the difference between these building control options can save you both money and a headache. The average cost of building management systems using traditional applications and strategies is at least \$2.50 per square foot, with prices reaching as high as \$7.00 per square foot.
