

## SolarMax Energy Systems

# How to convert 36V photovoltaic panel power generation to 12V

## Overview

---

The correct solution is simply to buy a solar charge controller that's made for 12V batteries, but which supports 50V or more on the input. We're not allowed to do product recommendation here, but there are plenty of those out there if you look for them.

## How to convert 36V photovoltaic panel power generation to 12V

---

### 12v Solar without a Battery

If you have a small 12v appliance that you wish to power/charge when the sun is out, you can use a 24v/36v to 12v step down converter. This will modulate the

...

## Hack Your 36V Solar Panel For 12V Operation

Just to be clear, this will compromise the integrity of the back sheet and likely reduce the useful life of the solar panel at the least. With possible ramifications I don't even know about.
