

SolarMax Energy Systems

How to make energy storage equipment profitable

Overview

Are battery energy storage systems a good investment?

Battery Energy Storage Systems (BESS) provide operators with multiple avenues to generate revenue. These systems are not limited to a single function but can capitalise on various market opportunities, making them highly versatile investments.

Are battery energy storage systems gaining momentum in Europe?

Recent capacity market auctions have shown strong momentum for battery energy storage systems (BESS) in European markets. In Belgium's latest Capacity Remuneration Mechanism (CRM), BESS projects dominated new capacity awards, securing 350MW across 13 projects and bringing total BESS contracts to 1.1GW.

Are thermal energy storage project developers transforming the TES industry?

The emergence of thermal energy storage project developers affirms our expectations for growth in the TES industry. The main driver for manufacturers is cost savings.

How scalable is energy arbitrage?

Among these revenue streams, energy arbitrage has emerged as the most scalable opportunity for BESS operators. While ancillary services can provide steady income, these markets are often capacity-limited and showing signs of saturation.

Which countries have a capacity market for battery energy storage?

Countries like Italy and Poland have seen capacity markets unlock large-scale battery storage, with contracts awarded based on cost-effectiveness. Recent capacity market auctions have shown strong momentum for battery energy storage systems (BESS) in European markets.
