

SolarMax Energy Systems

How to supply electricity to communication base stations with wind power

Overview

Hybrid energy solutions enable telecom base stations to run primarily on renewable energy sources, like solar and wind, with the diesel generator as a last resort. This reduces emissions, aligns with sustainability goals, and even opens up opportunities for carbon credits or green energy subsidies.

How to supply electricity to communication base stations with wind

The Role of Hybrid Energy Systems in Powering Telecom Base Stations

Discover how hybrid energy systems, combining solar, wind, and battery storage, are transforming telecom base station power, reducing costs, and boosting sustainability.

ENERGY STORAGE SYSTEM

Product Model

HJ-ESS-215A(100KW/215KWh)
HJ-ESS-115A(50KW/115KWh)

Dimensions

1600*1280*2200mm
1600*1200*2000mm

Rated Battery Capacity

215KWH/115KWH

Battery Cooling Method

Air Cooled/Liquid Cooled

Smart BaseStation

Smart BaseStation(TM) is an innovative, fully-integrated off-grid solution, that can provide power for a range of applications. It is the ideal turnkey solution for the off-grid market.
