

SolarMax Energy Systems

Huawei communication base station inverter energy storage

Overview

Why should you buy a Huawei solar inverter?

Why Choose Huawei?

Huawei is a recognized leader in the solar industry, renowned for its commitment to quality, innovation, and cutting-edge technology. The combination of the SUN2000-115KTL-M2 on-grid inverter and Smart String ESS LUNA2000-215KWH brings together the best of both worlds: efficient energy conversion and advanced energy storage.

How does the Huawei fusion solar inverter work?

The inverter is equipped with advanced smart management capabilities, allowing for real-time monitoring and control through the Huawei FusionSolar app, providing insights into energy production and system performance.

What makes Huawei a good battery management company?

Offering innovative battery management solutions, Huawei has placed emphasis on safety and performance optimization. Batteries are the heart of every storage system and are also subject to risks such as over- and under-discharge or over- and under-temperature.

How many kWh can a Huawei smart backup box hold?

With options of 5 kWh, 10 kWh or 15 kWh and extensions up to 30 kWh, it adapts to your requirements. The system is safe, reliable and easy to install, perfect for single and three-phase inverters. The wall mount for the storage can be purchased separately. The Huawei Smart Backup Box secures your power supply in the event of a power failure.

Do Huawei inverters need an isolation transformer?

Huawei's previous series inverters are treated as third-party inverters, resulting in the need for the addition of an isolation transformer. The isolation

transformer is also necessary when you want to use the ESS in the event of a blackout in backup mode since the PCS has a 3-wire connection without neutral.

How many machines can be installed in a Huawei C&I system?

These storage systems are very flexible, up to 5 machines can be installed in the same system, in this way there is scalability from approximately 97 to 970 kWh in steps of 30 kWh. The combination with string inverters from the Huawei C&I segment occurs naturally with a single supervision system.
