

## SolarMax Energy Systems

# Iceland replaces PV site with 418KWh

## Overview

---

Can Iceland generate 400 GWh of solar power by 2040?

The country has set a goal to generate 400 GWh of solar power annually by 2040. Iceland's solar journey may just be starting, but with improved government support, it's only a matter of time before solar energy becomes a key part of the country's renewable energy mix.

Can Iceland tap into its volcanic energy potential?

Iceland is a leader in renewable energy production, harnessing its geothermal and hydropower resources, and is now aiming to tap into its volcanic energy potential.

Will solar power be a competitive option in Iceland?

Iceland, known for its geothermal and hydropower, is starting to adopt solar energy. Thanks to falling costs and better technology, solar power is expected to become a competitive option within the next three to five years. The country has set a goal to generate 400 GWh of solar power annually by 2040.

Does Iceland have a geothermal power plant?

Iceland has a geothermal power generation capacity of around 755 MW, making it one of the world's largest geothermal energy generators. Iceland's Hellisheidi geothermal power plant is one of the top ten largest geothermal plants in the world. It generates 303 MW of electricity and 400 MW of thermal energy.

How much electricity does Iceland use?

Almost 100% of Iceland's electricity comes from renewable energy. In this case, the country's electricity use consists of 75% hydropower, and 25% geothermal energy. Hence, nine out of ten houses use geothermal energy for heating. In fact, most homes and industries use hydro and geothermal power sources.

Does Iceland have a hydropower project?

The country's extensive experience in hydropower has led Icelandic experts to develop many other hydro projects around the globe. Known as the land of ice and fire, Iceland plans to use not only its easy-to-access geothermal resources but to also develop new technology to tap into its extremely hard-to-reach energy potential.
