

SolarMax Energy Systems

Icelandic Communications Emergency Base Station

Overview

NRTF Grindavik originally had two for its longwave service – the west tower with a height of 243.8 metres (800 ft) and the east tower with a height of 182.9 metres (600 ft) – which were, when built, the tallest man-made objects in Iceland. In 1983, the east tower was replaced by a new tower of the same height. The west tower was replaced by a new 304.8-metre (1,000 ft) and 2,500-square-foot (230 m²), now the second tallest structure in , afte.

How do I contact Iceland's emergency response team?

Dialing the number 112 will get you through to Iceland's emergency response team. The dispatchers you reach handle calls for all the emergency services. That emergency can be on land, at sea or in the air. It doesn't matter.

How do I get to Iceland if I'm in an emergency?

In an emergency, there's a good chance you won't be thinking straight, so writing it down somewhere or storing it in your phone is a good idea. Dialing the number 112 will get you through to Iceland's emergency response team. The dispatchers you reach handle calls for all the emergency services. That emergency can be on land, at sea or in the air.

What services does the Icelandic government provide during emergency situations?

During emergency situations the Government sets up the following services: The operation of some of these services is often delegated to volunteer organisations, i.e. the Icelandic Association for Search & Rescue and the Icelandic Red Cross, which can provide the qualified manpower.

Does Iceland radio offer satellite communication?

Iceland Radio offers satellite communication service to aircrafts through IRIDIUM and IMMARSAT. When HF conditions deteriorate, a satellite communication can be applied. If the aircraft is equipped with a satellite phone on board, pilots can call Iceland Radio centre when necessary.

How does the Iceland emergency app work?

What the Iceland emergency app also has is the functionality to report you as safe. Press the green check-in button and report your GPS location to the authorities. The last five locations are stored, giving the emergency services a trail to follow if necessary.

Can Iceland radio call aircraft?

Moreover, Iceland Radio can call aircrafts equipped with a satellite phone. Aircrafts can request a phone patch to their company dispatch unit or to Medlink when necessary. Through HF and landline interconnection, Iceland radio can call and connect an aircraft to their company dispatch unit or to Medlink.
