

## SolarMax Energy Systems

# Indonesia Energy Storage Project Investment

## Overview

---

Indonesia seeks nearly US\$200B to hit 42.6 GW renewable goal by 2034, with solar, hydro, WTE, and battery storage as key investment drivers. Is energy storage developing in Indonesia?

IESR has issued a report for the first time assessing the development of energy storage in Indonesia in *Powering the Future: An Assessment of Energy Storage Solutions and The Applications for Indonesia*.

Why is battery energy storage system important in Indonesia?

However, given the challenge of Indonesia's geological landscape, with many off-grid and remote areas, there is growing intermittency issue that hamper the development of solar and wind generation. Hence, the battery energy storage system (BESS) technologies have a critical role in the development of Indonesia's renewable energy.

Will Tesla invest in Indonesia's battery energy storage system sector?

There have been talks with Tesla, with plans to invest in Indonesia's Battery Energy Storage System sector. Tesla has an outstanding reputation in its production of technology that is carbon neutral. The BESS produced and used by Tesla has a relatively low negative environmental impact.

Will Indonesia deploy 100 GW of solar?

The Indonesian government has revealed a new initiative aiming to deploy 100 GW of solar. The distributed solar for energy self-sufficiency program encompasses 80 GW of solar that will be deployed as 1 MW solar arrays with 4 MWh of accompanying battery energy storage systems (BESS).

Does Indonesia need solar & wind energy storage?

Although, there is no policy mandating the installation of energy storage in solar or wind projects in Indonesia, the abundance of solar and wind resources in Indonesia's archipelago and increased potential demand across industries

indicate that BESS demand is poised to grow substantially in the near future.

Can solar energy be a strategy to meet Indonesia's energy goals?

Solar energy can be a strategy to meet this target,” said Deon Arinaldo, Program Manager of Energy System Transformation, at the launch of the Indonesia Solar Energy Outlook 2025 study report – Breaking the Walls: The Future of Indonesia’s Solar Energy and Energy Storage Innovations (15/10/2024).
