

SolarMax Energy Systems

Integrated base station fusion communication platform

Overview

What is a space-based network information system?

The application provides development ideas. In the context of the rapid development of a new generation of information technology, the development of the integration of space and earth navigation and communication remote integration has become the mainstream of the development of space-based network information systems .

What is signal fusion & information fusion?

From the technical level of navigation and communication fusion, it is divided into signal fusion, information fusion, and hardware fusion. Signal fusion and information fusion will also drive hardware fusion. Here we focus on information fusion and signal fusion.

How can navigation and communication fusion improve the anti-jamming and anti-deception capabilities?

In military applications, navigation and communication fusion can effectively improve the anti-jamming and anti-deception capabilities of the navigation system in the face of strong enemy confrontation in the future.

How can data-level fusion extend the sensing range?

sing results are aggregated into the cloud layer for data-level fusion to extend the sensing range. Multi-node cooperation: Multiple nodes including UEs, macro BSs and micro BSs could participate in cooperative sensing to improve the sensing accuracy and range wit.

What is navigation and communication integration?

Navigation and communication integration is a complex problem with multiple application scenarios, multiple requirements, and multiple systems. It is impossible to solve the integration of navigation and communication with a set of solutions.

What is signal-level fusion?

of space coordinate systems and the alignment of sampling time of sensing results from multiple BSs. Signal-level fusion: Signal-level fusion is the fusion of echo signal from multiple BSs, which has higher complexity and higher accuracy compared with data-level fusion. Signal-level fusion improves the

Integrated base station fusion communication platform

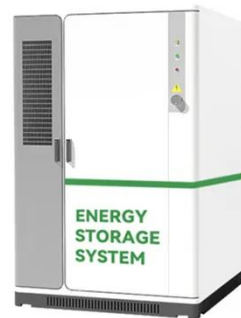

Integrated Sensing, Computation Control and ...

Integrated Communication, Sensing, Computing and Intelligence (ICSCI): ISAC refers to Integrated Sensing and Communication which is a signature ...
