

SolarMax Energy Systems

Integrated inverter 16 times the power

Overview

What is a sunsynk Max 16kw inverter?

The Sunsynk MAX 16kW is a low voltage (48V) hybrid inverter suitable for off-grid, grid support, back-up and self-consumption PV systems. Moreover, the inverter can also be used in both three-phase and single phase parallel applications. The largest single-phase hybrid Inverter on the market.

What is a hybrid inverter?

Hybrid inverters are essentially two inverters in one; they combine a solar inverter and a battery inverter into one simple unit. These advanced inverters use solar energy to power your home, charge a battery or send excess energy into the electricity grid. Most hybrid inverters can also provide emergency backup power during a blackout.

Does sigenergy have a hybrid inverter?

Notably, Sigenergy is the first company to release a fully integrated hybrid system that combines solar, battery storage, and bidirectional EV charging into a single unit. At its core is the hybrid inverter, available in single-phase and three-phase models ranging from 5kW to 25kW. All inverters support 200% solar oversizing.

How do I choose a hybrid inverter?

When evaluating a hybrid inverter, it's important to inquire about these capabilities and how they can be customized to suit your needs and preferences. Jason Svarc is an accredited solar and battery specialist who has been designing and installing solar and battery systems for over a decade.

Can a single phase hybrid inverter be used in parallel applications?

Moreover, the inverter can also be used in both three-phase and single phase parallel applications. The largest single-phase hybrid Inverter on the market. A total of 15 x inverters can be connected in a three-phase configuration (five

units per phase) - giving a maximum power output of 240kW.

How many X inverters can be connected?

A total of 15 x inverters can be connected in a three-phase configuration (five units per phase) - giving a maximum power output of 240kW. 3 x inverters can be connected in a single-phase configuration giving a total power of 48kW. Contains 3 x MPPTs to allow for flexible PV array designs and improved efficiency.

Integrated inverter 16 times the power

Sunsynk MAX 16kW Solar Hybrid Inverter

The Sunsynk MAX 16kW is a low voltage (48V) hybrid inverter suitable for off-grid, grid support, back-up and self-consumption PV systems. Moreover, the inverter can also be used in both ...
