

SolarMax Energy Systems

Introduction to n-type bifacial double-glass modules

GEL Battery

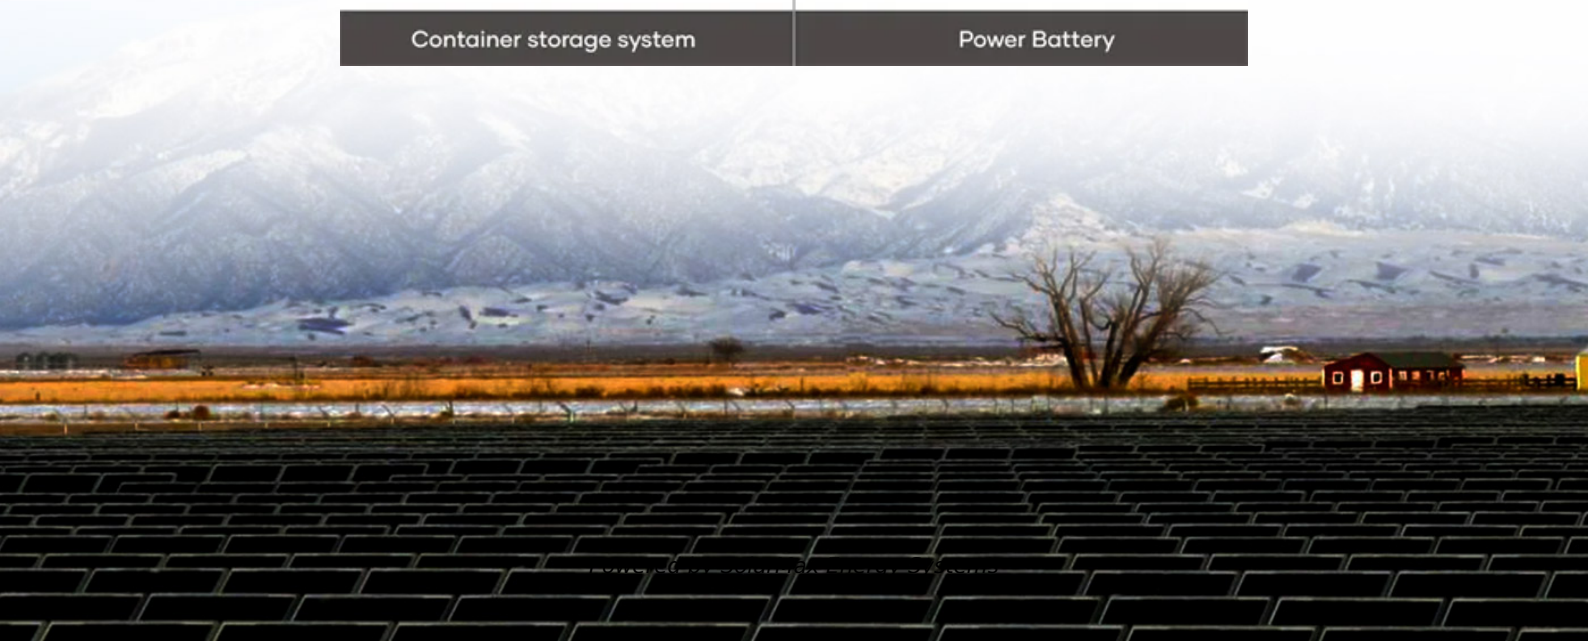

Lithium Battery

Container storage system

Power Battery

Overview

Interest in N-type bifacial modules has rapidly increased due to their ability to generate more power than conventional P-type bifacial thanks to their higher bifacial factor, lower degradation, lower temperature coefficient in addition more energy density and power class.

Introduction to n-type bifacial double-glass modules

N-type Bifacial Cell

The N-type substrate materials feature longer minority carrier lifetime, so the N-type Bifacial Modules can offer better generating capacity than the conventional P-type modules under low ...

High performance double-glass

bifacial PV modules through ...

Significant amount of near infrared light passes through bifacial cells. Double-glass structure shows a loss of ~ 1.30% compare to the glass/backsheet structure under STC measurements.

N-type Bifacial Double Glass Photovoltaic Modules

The Jolywood N-type Bifacial Half-cell Module can reach power output up to 575W. N-type material has zero LID/LeTID risk, which makes the modules to be more reliable, to ...
