

SolarMax Energy Systems

Investigation of home energy storage manufacturers

Overview

What is the energy storage Inspector?

The web app can be used to compare the most important efficiency characteristics of the analyzed storage systems. The Energy Storage Inspector is continuously being expanded to include new products. Interested manufacturers can contact the Solar Storage Systems Research Group at HTW Berlin directly.

How many manufacturers have taken part in the energy storage inspection 2025?

Since 2018, a total of 33 manufacturers have taken part in the Energy Storage Inspection, of which 24 companies decided to be mentioned by name in the study. The Energy Storage Inspection 2025 was developed as part of the „Perform“ project, which is funded by the Federal Ministry of Economic Affairs and Climate Action (BMWK).

How many MWh is a residential energy storage system?

The data set totals 263 MWh, and covers all or a portion of installations in 20 states and the District of Columbia. WoodMac estimated that U.S. residential energy storage installations were 540 MWh in 2020, though an exact share of the market is not calculated here due to differences in the data such as when systems are considered installed.

Which solar energy storage systems are the most efficient?

The most efficient solar energy storage systems in the 5 kW and 10 kW classes, which won the 2025 Energy Storage Inspection. In addition to the European suppliers, only the Chinese manufacturers GoodWe and Fox ESS are represented among the best-placed devices this year.

Can energy storage be used in small nonresidential systems?

While this paper focuses on residential energy storage, some of the same

ESSs may be used in small nonresidential systems. Nonresidential installations include installations at industrial sites, commercial buildings, nonprofits, government buildings, and similar locations, and do not include utility installations.

Is Tesla Energy a good energy storage company?

Tesla Energy's energy storage business has never been better. Despite only launching its energy storage arm in 2015, as of 2023 the company had an output of 14.7GWh in battery energy storage systems. Its portfolio includes storage products like the Powerwall and the Megapack.
