

SolarMax Energy Systems

Irish energy storage battery companies

Overview

What is energy storage Ireland?

Energy Storage Ireland is a representative association of public and private sector organisations who are interested and active in the development of energy storage in Ireland and Northern Ireland. Delivering the energy storage technologies to enable a secure, carbon free electricity system on the island of Ireland by 2035.

How many MW of battery storage capacity are there in Ireland?

We currently have more than 300MWs of battery storage capacity in operation in Ireland, making it one of the largest battery portfolios in Europe. We plan to develop a pipeline of large scale battery projects, as well as additional renewable enabling technologies.

Which battery energy storage systems are available in Ireland?

The Kylemore Battery Energy Storage System in Dublin went into operation in 2023 and has the capability of providing 30MW of fast-acting storage. The South Wall Battery Energy Storage System went live in 2023 and has the capability of providing 30MW of fast-acting energy storage.

Is battery storage a key part of Ireland's energy transition?

Battery storage is a critical part of Ireland's energy transition and I welcome new investors who are committed to delivering our ambitious 2030 targets." Jorge Pikunic, CEO of VPI – "I am excited about the role VPI will play in supporting the Irish Government's Climate Action Plan.

Will battery storage help Ireland generate 80% renewable electricity by 2030?

Ireland has set a target of generating 80% renewable electricity by 2030. Deployment of battery storage will be capable of responding in milliseconds to frequency changes, importing or exporting electricity from the grid as needed, and helping efficiently stabilise the grid, while guaranteeing reliable electricity

supply for users.

What is RWE renewables' second Irish-based battery storage project?

RWE Renewables' second Irish-based battery storage project is in Co Monaghan. It is a 60 megawatt (MW) facility at Lisdrumdoagh, (Lisdrum for short) and is capable of providing a rapid delivery of electricity into the power grid to balance fluctuations and can also be used as a short term electricity back up to help prevent power outages.
