Israel Wind and Solar Energy Storage Power Station

Overview

The Ashalim power station is a concentrated solar power station in the Negev desert near the community settlement of Ashalim, south of the district city of Be'er Sheva in Israel. It consists of three plots with three different technologies through which the station combines 3 kinds of energy: solar thermal.

According to a press release of the , the establishment has several motivations:1. Economic motivation: reducing imports thus balancing the trade and releasing foreign currency.

The project in Ashalim was announced in 2008 and awarded in a competitive auction 2012 at NIS0.79 (\$0.22) per kilowatt hour for Plot B – almost a factor of.

• • •

Israeli renewable energy company Nofar Energy Ltd will develop over 1 gigawatt-hour (GWh) of energy storage capacity across 60 locations in Israel. These locations belong to the retail chain Machsanei HaShuk. The estimated investment for the project is 500 million Israeli shekels (USD 135.1 million).

Israel Wind and Solar Energy Storage Power Station

Israel publishes tender for large solar-plus-storage plant

Israel has published a tender for the construction of what would be the country's largest solar power plant, to be coupled with an energy storage component, newspaper Globes reports.
