

## SolarMax Energy Systems

# Italian low-voltage energy storage project

## Overview

---

In this project outside Rome, three key pieces of technology came together to create an efficient, safe, and intelligent energy system: the Afore AF6K-SLP hybrid inverter, a 10kWh low-voltage battery system, and a 6.3kW high-efficiency photovoltaic (PV) array. What is the future of energy storage in Italy?

MP: The future of energy storage in Italy is bright. With investments in technology, regulatory support, and declining costs, BESS will become a key pillar of Italy's transition to a sustainable energy future. Telis Energy is proud to play a role in this journey by originating, developing, and building high-quality BESS projects.

Will Cubico develop a battery energy storage system in Italy?

Cubico Sustainable Investments has announced plans to develop 1GW-plus of battery energy storage system (BESS) projects in Italy.

How important are BESS in Italy's energy transition?

MP: BESS are becoming increasingly vital in Italy's energy transition. With the ambitious targets outlined in the National Energy and Climate Plan (NECP), including reducing carbon emissions and increasing renewable energy to 30% of final energy consumption by 2030, BESS are essential.

What is the regulatory environment like in Italy?

MP: The regulatory environment in Italy is supportive. Recent policy changes include streamlined permitting processes and financial incentives for energy storage projects. The National Recovery and Resilience Plan (NRRP) allocates €1.5 billion for green technologies, including BESS.
