

## SolarMax Energy Systems

# Japan s 9th Games New Energy Storage

## Overview

---

How big is Japan's battery storage capacity?

Rystad forecasts Japan's battery storage capacity could reach about 4 GW based on projects under construction, planned and awarded, which would require \$6 billion in investment.

How much do Japanese companies spend on battery storage projects?

Since December 2023, companies have announced investments of at least \$2.6 billion in Japanese battery storage projects, according to calculations by Reuters. That includes \$677 million in spending by Japanese real estate firm Hulic (3003.T) announced in January and \$1.3 billion by trading house Sumitomo (8053.T) last year.

What is Japan's energy storage policy?

As policy, technology, and decarbonization goals converge, Japan is positioning energy storage as a critical link between its climate targets and energy reliability. Japan's energy storage policy is anchored by the Ministry of Economy, Trade and Industry (METI), which outlined its ambitions in the 6th Strategic Energy Plan, adopted in 2021.

How is Japan's energy storage landscape changing?

Japan's energy storage landscape is shifting, pushed by household demand, corporate ESG mandates, and domestic battery manufacturing. The residential lithium-ion market, projected to grow at a CAGR of 33.9% through 2030, remains one of the fastest-expanding segments.

Why are Japan and Kyushu so attractive for battery projects?

"Tohoku and Kyushu regions have a lot of renewables, which makes these regions very attractive for battery projects, and that's why there is a lot of contracted and considered projects there already," said Uranulzii Batbayar, a Tokyo-based analyst with Rystad Energy.

Does Japan's energy storage rollout face structural headwinds?

Despite strong policy signals, Japan's energy storage rollout faces deep structural headwinds. The nation's split-grid architecture—50 Hz in the east and 60 Hz in the west—limits electricity transfer and complicates nationwide deployment.
